

Vehnta

software

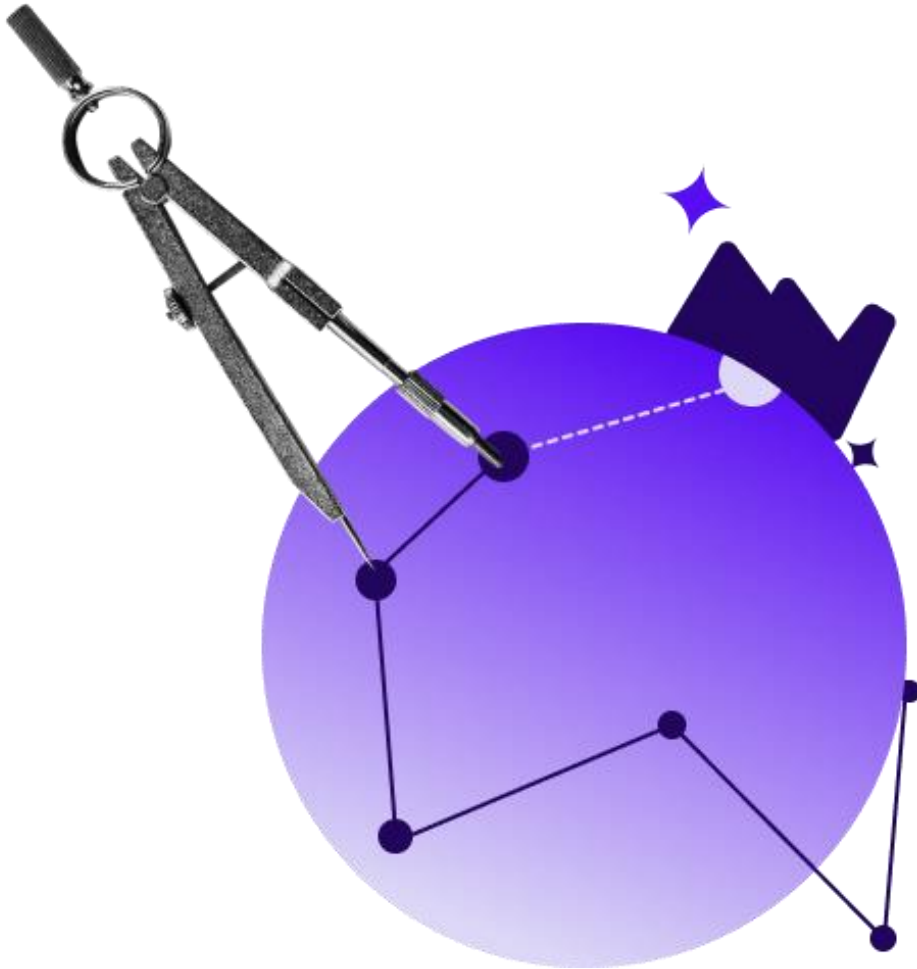

solutions for the Manufacturing Industry

VehntaSoftware

Empowers manufacturing companies to optimize Google Ads, **generate qualified leads**, and refine Account-Based Marketing (ABM) with data-driven insights on prospects, markets, and competitors.

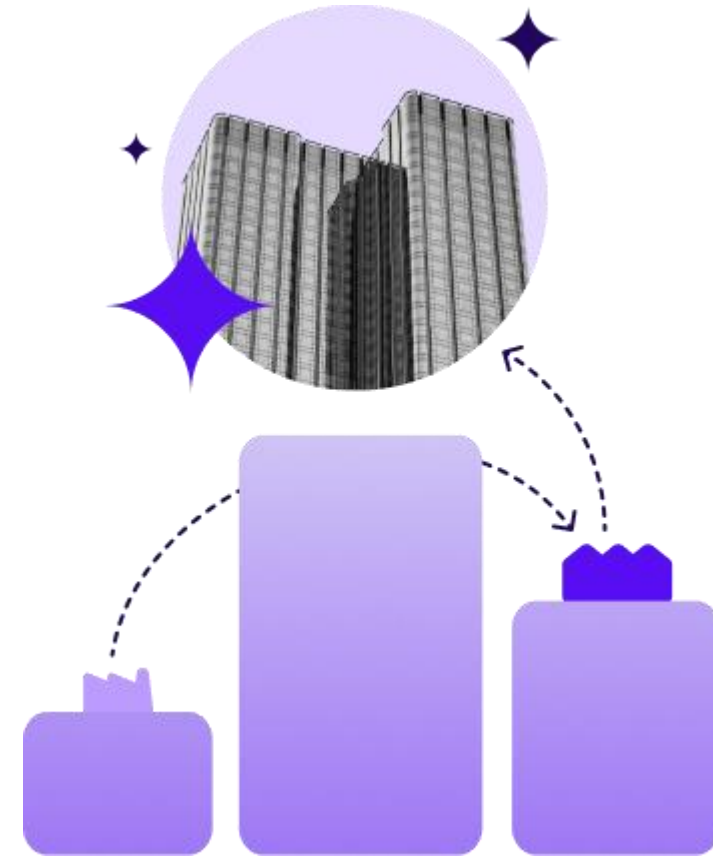

VehntaSoftware

A MarTech solution born from the manufacturing sector, provides **industry-proven solutions** for the challenges of long sales cycles, technical products, and multi-layer decisions. Its data-driven ABM helps manufacturing companies identify their ICP based on location, product and financial **insights**.

Key features for Manufacturing Industry

- Target only your **ideal customers**, select the right companies, reinvest, scale
- Target and engage only companies or **retailers** that are ready to buy
- Leverage **actionable insights** to refine your commercial strategies
- Map market needs and **identify opportunities** with precision
- Help your **dealers to be more competitive** in their referred areas

Experience a New Approach.
Maximize every marketing and sales cent,
crucial for growth.

Thank you
